

# CORE PRO GRASS

This product can be specified for all types of grass parking and driving areas, from overflow car parks to Fire Engine access routes. The grid is first filled with soil and then either seeded or turfed.

Our CORE PRO GRASS provides an incredibly high load bearing, making it suitable for heavy vehicles and high traffic loads.

The panels are manufactured with high density polyethylene which means it is extremely strong & durable, enabling it to absorb immense pressure from heavy vehicles and livestock.

The panels will automatically stabilise each other once installed and the panels have lateral drainage holes to prevent a build up of water within the cells. This combination of vertical and lateral drainage help to maintain the perfect growing conditions for grass.

Available in both black and green with white 'plug-in' markers to create parking bays, this system will comply with current UK building regulations for commercial car parks.

For any additional information or specification queries please give our technical team a call on freephone 0800 118 2278.

## TECHNICAL SPECIFICATION

<b>Material</b>	Recycled HDPE
<b>Sheet Size</b>	(500x390mm) 0.195m <sup>2</sup>
<b>Weight Per Panel</b>	1.1 Kg
<b>Cell Wall Thickness</b>	3mm
<b>Suitable Fill Material</b>	Soil or gravel if required
<b>Depth of Cells</b>	45mm (width 55mm)
<b>Resistant Against</b>	Ammonia / UV / Frost
<b>Pinning Required</b>	No

## APPLICATIONS

- Grass Domestic Driveway
- Grass Parking Area
- Suitable for HGV Through-Traffic
- Disabled Friendly Access Route

## BENEFITS

- DDA COMPLIANT**
- ECO-FRIENDLY**
- LOW COST**
- NO MUD**
- FREE DRAINING**
- EASY INSTALL**
- STABILISES GRASS**
- STRONG**
- SUDS COMPLIANT**
