

# CORE GRASS

## FLEX MESH 450GSM

CORE GRASS FLEX MESH 450gsm is a ground/grass protection mesh that provides the ideal grass matting protection for domestic garden pathways, light footfall pedestrian areas and is also a popular choice as a base layer to be installed underneath rubber grass mats.

CORE GRASS FLEX MESH 450gsm is a medium duty grass protection mesh which is often used for pedestrians, wheelchair users, light machinery such as lawn mowers and even chippers occasionally. The mesh is also pet friendly and can be laid in domestic settings at your home, be it a garden pathway or a grass patch that requires some further protection.

CORE GRASS FLEX MESH 450gsm features an hexagonal pattern and is unique due to it's slip resistant surface that offers a sure footing to pedestrians and animals. The 30mm aperture size ensures that once laid, the grass can begin to regrow naturally through the cells to appear natural and unseen to the eye.

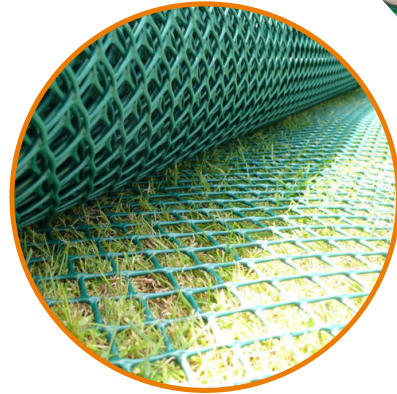

The mesh is super quick and easy to install and also requires no special skills or equipment to install.

For best results, the CORE GRASS FLEX MESH should be laid down in early spring through to late summer when the grass will grow quickly through the mesh itself - allowing the root mass to form an interlock with the mesh filaments. The protected area will soon look natural aesthetically, but will provide a stable surface.

### TECHNICAL SPECIFICATION

|                          |                         |
|--------------------------|-------------------------|
| <b>Material</b>          | HD Polyethylene         |
| <b>Structure</b>         | Hexagonal               |
| <b>Aperture Diameter</b> | 30mm                    |
| <b>Roll Size</b>         | 1 x 10m & 2 x 30m       |
| <b>Roll Weight</b>       | 4.5kg & 27kg            |
| <b>Thickness</b>         | 3mm                     |
| <b>Colour</b>            | Green                   |
| <b>Unit Weight</b>       | 450g per m <sup>2</sup> |

### APPLICATIONS

- Domestic Garden Pathways
- Underlay for Rubber Grass Mats
- Anti Grass Erosion for Gardens
- Medium Duty Pedestrian Use

### BENEFITS
