

CORE Rubber Mat

CORE Rubber Mats are a versatile multi-use product, they can be used to create slip resistant walkways, safety areas around play equipment or be used as grass protection mats to avoid root damage and mudbaths forming.

The structure of the CORE Rubber Mat allows effective water drainage and maintains a natural appearance, allowing grass to grow and be treated as normal. They can be used on level or undulating ground and are extremely quick and easy to install. Widely considered as the most cost effective and affordable forms of grass protection, they're also highly effective in creating non-slip walkways or foot trafficked areas that are susceptible to becoming a high slip risk in the poor weather conditions we are accustomed to in the winter months.

Use in both commercial and domestic applications can both be achieved with no specialist skills, as the mats can be fitted together with the fixing pegs and cable ties. To increase the longevity of the system combine the Rubber Grass Mats with our CGPM450 grass protection mesh, by adding a layer of mesh below the mats it will strengthen and reinforce the ground below the mats.

For any additional information or specification queries please give our technical team a call on freephone 0800 118 2278.

TECHNICAL SPECIFICATION

Material	Recycled Rubber
Mat Size	(1500 x 1000mm) 1.5m²
Weight	12kg Per Mat
Cell Wall Thickness	10mm
Aperture Size	22mm
Depth of Cells	23mm
Colour	Black
Fixing Method	Fixing Pegs
Pallet Quantity	50 Mats

APPLICATIONS

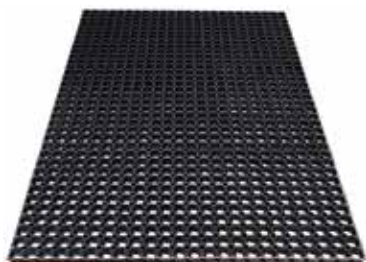

- Playground Areas
- Grass Protection
- Non Slip Surfacing
- Equestrian Stables

BENEFITS

-  **DDA COMPLIANT**
-  **ECO-FRIENDLY**
-  **LOW COST**
-  **MULTI-USE**
-  **EQUINE FRIENDLY**
-  **EASY INSTALL**
-  **NON SLIP SURFACING**
-  **STRONG**
-  **SUDS COMPLIANT**

CORE Rubber Mat

CORE Rubber Mats are a versatile multi-use product, mainly due to their variety of applications and ways in which you can use them. Designed carefully to ensure they offer grip and a firm footing on areas where slipping is a hazard - they can either make an area slip resistant or be used in grass areas to protect the grass root and avoid a mudbath forming.

Due to the structure of the CORE Rubber Mat, it allows effective water drainage and maintains a natural appearance, allowing grass to grow and be treated as normal. They can be used on level or undulating ground and are extremely quick and easy to install. Widely considered as the most cost effective and affordable forms of grass protection, they're also highly effective in creating non-slip walkways or foot trafficked areas that are susceptible to becoming a high slip risk in the poor weather conditions we are accustomed to in the winter months.

- Suitable for all weather types
- Shock absorbing
- Slip Resistant
- Reduces ground erosion

Use in both commercial and domestic applications can both be achieved with no specialist skills, as the mats can be fitted together with the fixing pegs and cable ties. To increase the longevity of the system combine the Rubber Grass Mats with our CGPM450 grass protection mesh, by adding a layer of mesh below the mats it will strengthen and reinforce the ground below the mats.
