

# CORE GRASS 40

This product can be specified for all types of grass parking and driving areas, from overflow car parks to fire engine access routes. The grid is first filled with soil and then either seeded or turfed.

Max. weight on the grid = 238 tonnes

Our CORE GRASS 40 provides an incredibly high load bearing, making it suitable for heavy vehicles and high traffic loads.

The panels are manufactured from polyethylene which means it remains permanently elastic, enabling it to absorb immense pressure from heavy vehicles and livestock.

Each sheet also has an interlocking mechanism on all four sides which allows all adjacent panels to be connected in every direction. This creates a continuous matrix across the entire surface.

Available in both black and green with white 'plug-in' markers to create parking bays, this system will comply with current UK building regulations for commercial car parks.

For any additional information or specification queries please give our technical team a call on freephone 0800 118 2278.

Available in Black or Green

## TECHNICAL SPECIFICATION

<b>Material</b>	<b>Polyethylene</b>
<b>Sheet Size</b>	<b>(800 x 800mm) 0.64m<sup>2</sup></b>
<b>Weight Per Panel</b>	<b>3.15 Kg</b>
<b>Cell Wall Thickness</b>	<b>3.5mm</b>
<b>Suitable Fill Material</b>	<b>Soil</b>
<b>Depth of Cells</b>	<b>40mm (width 70mm)</b>
<b>Resistant Against</b>	<b>Ammonia / UV / Frost</b>
<b>Clipping Mechanism</b>	<b>Socket &amp; Pin</b>
<b>Pinning Required</b>	<b>No</b>

## APPLICATIONS

- Grass Domestic Driveway
- Grass Parking Area
- Suitable for HGV Through-Traffic
- Disabled Friendly Access Route

## BENEFITS

 <b>DDA COMPLIANT</b>	 <b>ECO-FRIENDLY</b>	 <b>LOW COST</b>
 <b>NO MUD</b>	 <b>FREE DRAINING</b>	 <b>EASY INSTALL</b>
 <b>STABILISES GRASS</b>	 <b>STRONG</b>	 <b>SuDS COMPLIANT</b>
