

ALBION LODGE LTD ALBION MEADOWS

THE CONTRACTOR

Albion Lodge Ltd developed Albion Meadows beside its established care home in Hanley Swan. Supplied through MKM, CORE's gravel grids, aluminium edging and parking markers helped bring the new parking areas together.

PROJECT OVERVIEW

Set against the Malvern Hills, Albion Meadows brings 16 independent-living apartments to Hanley Swan. Landscaped grounds, meadow walks and generous balconies make the countryside part of daily life, with resident and visitor parking close to home.

1,180m²

CORE DRIVE GRAVEL STABILISATION

KEY REQUIREMENTS

Create stable gravel parking for residents and visitors, with clearly defined bays and neat edges that sit comfortably alongside the landscaped grounds.

PRODUCT

The parking needed to feel at home in this rural setting. We supplied white CORE DRIVE 40-30 and 40-40 grids to hold the gravel in place, alongside CORE PRO EDGE and white parking markers. A practical package with a natural finish.

The gravel finish brings warmth to the parking areas, while the grid beneath helps keep the surface stable.

SOLUTION

CORE DRIVE supports everyday parking while retaining the character of loose gravel. Its honeycomb cells hold the stone in place, helping reduce movement beneath tyres and feet.

Aluminium CORE PRO EDGE gives the surface a neat boundary, while white markers define the bays. Together, the products help make arrival feel organised and welcoming.

GRAVEL THAT STAYS PUT

Honeycomb cells help hold the aggregate in place and reduce rutting under everyday use.

NEAT, DEFINED EDGES

Slim aluminium edging contains the gravel and gives the parking areas a clean finish.

CLEAR PARKING BAYS

White markers define the spaces while keeping the natural gravel finish in view.
