

BLAKEDOWN LANDSCAPES ITCHEN VALLEY COUNTRY PARK

THE CONTRACTOR

Blakedown Landscapes delivered the park's transformation for Eastleigh Borough Council. We supplied CORE PRO EDGE to support the landscape detailing around Highwood Barn, bringing a crisp finish to the renewed visitor spaces.

PROJECT OVERVIEW

A £3.3 million transformation has brought fresh life to Itchen Valley Country Park. Renewed barns, outdoor seating, new pedestrian links and richer planting create a welcoming setting for family days out, community events and time spent in nature.

580lm

CORE PRO EDGE · 100mm + 150mm

PRODUCT

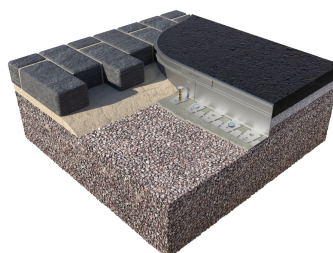

We supplied 580lm of CORE PRO EDGE in 100mm and 150mm aluminium profiles. The edging gives Blakedown a neat way to separate adjoining surfaces, retain the build-up and create clean lines that sit quietly within the park's natural setting.

Small details make a big difference: a clean edge lets the landscape take centre stage.

KEY REQUIREMENTS

Create tidy boundaries between adjoining surfaces, accommodate different build-up depths and deliver a finish suited to a busy country park.

Curved edging haunched with concrete

Edging follows the new path alignment

SOLUTION

The installation photographs show how CORE PRO EDGE helped turn the layout into clearly defined routes. Sweeping curves follow the planting boundaries, with the edging haunched with concrete before the final surfacing.

The slim aluminium profile creates a neat division between materials, keeping the finished landscape's flowing lines in focus.

The wider park and new visitor facilities

CLEAN BOUNDARIES

A neat division between adjoining landscape surfaces.

TWO PROFILE DEPTHS

100mm and 150mm options to suit different build-up depths.

A SUBTLE FINISH

Slim aluminium profiles keep the focus on the landscape.
