

MS CONTRACTS MANAGEMENT RIVERSIDE, SALFORD

THE CONTRACTOR

MS Contracts Management specialises in landscaping and project management. At Riverside, the team renewed Bruntwood's courtyard with planted terraces, lawns and outdoor seating areas. We supplied CORE DATUM EDGE and movable CORE PLANTERS.

PROJECT OVERVIEW

Bruntwood's Riverside brings four striking modernist office buildings together on the banks of the River Irwell. Its renewed courtyard combines planted beds, lawns and sheltered seating, creating an inviting outdoor setting for meetings, breaks and events in the heart of Salford.

5 CORTEN PLANTERS

1200MM | LOCKABLE CASTORS

KEY REQUIREMENTS

The courtyard needed durable edges around its planted beds and movable planting for different seating layouts and events, all in a finish that complemented the buildings.

PRODUCTS

Against Riverside's concrete buildings, CORE DATUM EDGE and matching CORE PLANTERS add warmth and character. The edging neatly defines the planted beds, while the movable planters bring greenery into seating areas and keep the courtyard free to adapt.

A change of layout? Lockable castors let the planters move with it, so the planting can work around seating and events.

SOLUTION

We supplied 150mm Corten CORE DATUM EDGE and five 1200mm Corten CORE PLANTERS. The 3mm steel edging gives the planted beds a strong, neat border.

The planters add greenery around the seating areas. Their lockable castors allow the layout to change for events or everyday use, with the same warm Corten finish throughout.

CLEAN BORDERS

Strong steel edging keeps the courtyard's planted beds neatly defined.

FLEXIBLE PLANTING

Lockable castors let the planters move to suit changing seating layouts and events.

WARM CORTEN FINISH

Matching edging and planters add warmth alongside the concrete buildings and green planting.
