

MS CONTRACTS MANAGEMENT STAMFORD SQUARE ALTRINCHAM

THE CONTRACTOR

MS Contracts Management installed the movable Corten planters as part of Stamford Square's regeneration for Bruntwood and Trafford Council. We supplied the team with ten CORE PLANTERS to bring greenery and flexibility to the new square.

PROJECT OVERVIEW

Altrincham's largest pedestrianised square is a key gateway between the town centre, Foundation and the transport interchange. Its regeneration brings new seating and planting to a busy meeting place, creating a welcoming setting for outdoor dining, shopping and community events.

10 CORE PLANTERS

1200MM CORTEN | LOCKABLE CASTORS

KEY REQUIREMENTS

The square needed robust planters that could soften the paving and shape seating areas, while allowing space for events and access. They also needed to stay securely in place once positioned.

PRODUCT

CORE PLANTERS bring greenery to Stamford Square's paved spaces, with a warm Corten finish that complements the timber seating. Their lockable castors make it easy to change the layout, so the planting can work around busy shopfronts, outdoor dining and events.

A square that changes with the day. Lockable castors let the planting move to make room for seating, events and access.

SOLUTION

We supplied ten 1200mm Corten CORE PLANTERS, each fitted with five lockable castors. The planters add greenery along the shopfronts and help make the open square feel more welcoming.

Their movable design gives the team freedom to refresh the layout for daily use or events, then lock each planter in its new position.

A GREENER SQUARE

Planted Corten units soften the paved square and bring colour and greenery along the shopfronts.

ROOM FOR CHANGE

Lockable castors allow the planters to be moved as seating, events and access needs change.

WARM CORTEN FINISH

The rich Corten finish sits comfortably alongside the timber seating and surrounding planting.
