

THE SUNRAY OSMINGTON

THE CONTRACTOR

Longshore Developments and the Hunt family brought The Sunray back to life, creating a welcoming pub and holiday destination. CORE supplied the gravel stabilisation through Jewson and Gibbs & Dandy.

PROJECT OVERVIEW

A fresh chapter for a Dorset landmark. The Sunray combines a restored village pub with 14 boutique holiday cottages, landscaped grounds and space for families to unwind. Close to the Jurassic Coast, the scheme brings a much-loved setting back into everyday use.

1,360m²

CORE COMMERCIAL SUPPLIED

KEY REQUIREMENTS

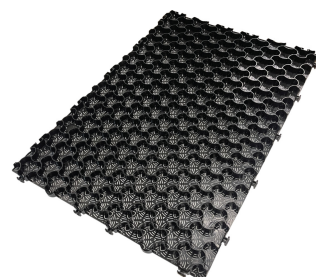

Create practical gravel parking for pub visitors and cottage guests, with a natural appearance that sits comfortably beside the buildings and landscaped grounds.

PRODUCT

We supplied CORE COMMERCIAL to give the gravel areas strength beneath a natural finish. Its cells hold the stone in place, helping create a firmer surface for vehicles and guests while keeping the relaxed countryside character of The Sunray.

A welcoming arrival starts underfoot: natural gravel, held firmly in place.

SOLUTION

The parking needed to feel part of the destination. CORE COMMERCIAL supports a natural gravel finish that complements the cottages, planting and restored pub.

The grid holds the gravel in place, helping reduce movement and rutting under everyday use. A firmer surface for guests, with the softer look of gravel.

GRAVEL THAT STAYS PUT

Cells retain the stone, helping reduce loose gravel movement under wheels and feet.

MADE FOR BUSY ARRIVALS

Heavy-duty gravel stabilisation supports the demands of everyday parking.

A NATURAL WELCOME

A gravel finish complements the buildings and planting, keeping the setting relaxed.
